The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated. Consult your local laws before transacting in any cryptocurrency.

The Key Utilities	14-19
The Tokenomics	20-21
The Community	22
The Summary	23

The Problem

Finn was a believer in blockchain technology. He believed in a decentralized system that was autonomous from traditional finance. Yet, like many in their early crypto investing days, he was an **absolute magnet** for rugpulls and other scams.

Finn sought out a way to facilitate a safer environment for investors simply wanting to create a sustainable legacy of wealth for their families.

Sure, the scammers were getting smarter – but so was Finn. He saw what was working well in the space, and what wasn't. Ultimately, he determined that community & education combined could prove to be a powerful **DeFi detoxifier...**

The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated. Consult your local laws before transacting in any cryptocurrency.

The Problem

Cryptocurrency is the current Gold Rush of our times. There is a legitimate opportunity, that with the right guidance, can enhance many lives via smart, informed investments. However, with such opportunity for wealth to be made comes a **high risk** with making these decisions. The high risk and the high volatility in crypto make this space seem taboo to the broader general public. It is in this moment of people feeling uncertain about crypto that 100xGEMS views its opportunity to change the narrative of investing in crypto by helping communities elevate the **right projects**.

The crypto space is currently filled with so much toxicity that over the last two years, the optimistic energy is slowly being drained out of nearly every single crypto community. The lack of education around cryptocurrency is putting people in danger of possibly losing their investments in just **mere minutes**, in many cases.

One thing is absolutely certain: Things need to change... and fast.

The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

The Mission

At 100xGEMS, we are focused first and foremost on helping our greater community understand the ins/outs of what investing in crypto is all about.

This means understanding the following:

- Smart Contracts
- Tokenomics
- Centralized/Decentralized Exchanges
- Project Strengths & Weaknesses

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to sell, nor is it a recommendation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated. Consult your local laws before transacting in any cryptocurrency.

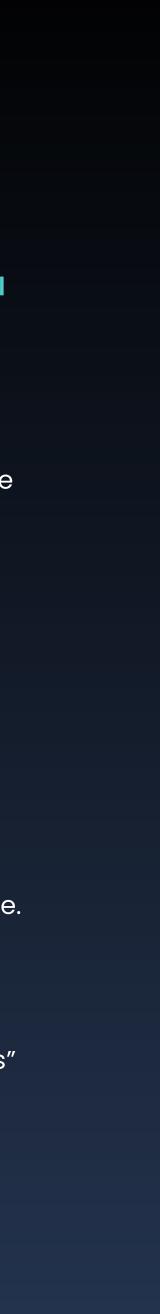

100xGEMS is all about finding the right projects and helping our community members to **feel confident** about new potential investment opportunities. The acronym WAGMI (We're All Gonna Make It) is thrown out in our space often, but as a project, we truly want to embody WAGMI by lending our expertise and knowledge of crypto investing to our holders.

As we begin to evolve as a project over the next several months, you will begin to meet more experts we are partnering with who will publicly join our community and share information about potential 100x gems that show early signs of standing power.

We will work side-by-side with doxxed influencers, callers, shillers and verified whales to provide our community the very best crypto education and empower our holders with the proper knowledge and confidence to succeed as a crypto investor. 100xGEMS will facilitate this educational engagement through a variety of virtual "lounges", which will always be accessible to our holders.

100xGEMS will also release a smart contract builder that will make constructing and understanding smart contracts **simpler** to instill confidence within new creators in our space. Furthermore, creators with be able to take advantage of our fair launch deployer to ensure their smart contract launch goes off without a hitch.

As our community grows and becomes more savvy investors, we will release our "Producers" NFT Collection, which will enable our members to become directly involved in the formation and ownership of our chief utility – our mainstream TV show – **a "Shark Tank" for crypto**.

The Roadmap

Phase I

Phase I is what we consider to be our Launch Phase.

This phase, which we anticipate will only span a few weeks longer, involves us launching on Uniswap as an ERC-20 token, which was done on March 24th, 2023 as a 100% fair launch. It also involves us making the 100xGEMS token available on Voltichange, Volt Inu's DEX (decentralized) exchange), which was done on April 3rd, 2023. Finally, it involves us listing 100xGEMS on our very first CEX (centralized exchange), CoinTiger, which was done on April 11th, 2023.

We are currently in the process of getting listed on CoinMarketCap (CMC) & CoinGecko (CG) as of the release of this whitepaper (April 19th, 2023). We anticipate we will be listed very soon on these two platforms.

Our last goal in Phase I is to have a total of 500 100xGEMS holders, which is currently the only other goal to be achieved in Phase I.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed towards any person located in a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

- ✓ Fair Launch on Uniswap
- \checkmark Website 1.0
- √ Whitepaper 1.0
- ✓ First CEX Listing
- **500** Telegram Members
- **500** Twitter Followers
- CoinMarketCap Listing
- CoinGecko Listing
- 500 Token Holders
- ✓ First Youtube AMA

Phase II

Phase II is what we consider to be our **Unite Phase**.

This phase involves us listing on a total of at least 5 CEXs. This is also the phase when the community can expect the release of our project's first utility, **our smart contract builder**.

Additionally, we anticipate having our smart contract audited and our marketing campaigns (i.e. Youtube, Twitter, TikTok) kicking into gear.

Our goal is to have 2k Telegram members, 2k Twitter followers & 2k token holders during this phase, as well.

Finally for Phase II, we will release our project's second utility, **our fair launch deployer**, which creators can leverage after building their smart contracts, to completely prevent all sniping & front-running bots from exploiting unfair advantages and keep launch day investors from getting REKT by these non-human wealth-blockers.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to sell, nor is it a recommendation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated. Consult your local laws before transacting in any cryptocurrency.

- Influencer Marketing Launch
- **5** CEX Listings
- 2k Telegram Members
- 2k Twitter Followers
- 2k Token Holders
- Smart Contract Builder Release
- Fair Launch Deployer Release
- Smart Contract Audit

Phase III

Phase III is what we consider to be our **Build Phase**.

This phase involves us listing on a total of at least 20 CEXs, including 5 "Tier 2" listings. This is also the phase when the community can expect the release of our project's second & third utilities, our crypto community platform & our "Producers" NFT collection.

Additionally, we anticipate having our social media influencer marketing campaigns in full swing, bringing in some of the most talented and respected voices in our space.

Our goal is to have 10k Telegram members, 10k Twitter followers & 10k token holders during this phase, as well.

Finally for Phase III, we will be assembling our TV production team to develop our pilot episode (1st episode) for our TV series we hope will make a splash – a "Shark Tank"-style crypto TV show.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of towards any person located in a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

- 20 CEX Listings
- **5** "Tier 2" Listings
- 10k Telegram Members
- 10k Twitter Followers
- 10k Token Holders
- Crypto Community Platform Launch
- "Producers" NFT Collection Launch
- Assemble TV Production Team

Phase IV

Phase IV is what we consider to be our **Expand Phase**.

This phase involves us listing on a total of at least 100 CEXs, including at least 2 "Tier 1" exchanges. This is the phase when the community can expect the release of our project's fourth utility, our "Shark Tank"-style crypto TV show.

Additionally, we anticipate our marketing campaigns will expand from online influencers to billboard & print advertising, as well as TV & radio commercials.

Our goal is to have 50k Telegram members, 50k Twitter followers & 50k token holders during this phase, as well.

Finally for Phase IV, we will be in production with our fully-financed pilot episode of our "Shark Tank"-style crypto TV show. After securing a production deal with a major streaming platform, the 100xGEMS team will work to secure syndication & franchising deals to further expand the 100xGEMS brand.

Consult your local laws before transacting in any cryptocurrency.

- 100 CEX Listings
- 2 "Tier 1" Listings
- 50k Telegram Members
- **50k** Twitter Followers
- 50k Token Holders
- "Shark Tank"-style Show Launch"
- Syndication + Franchising Deals
- Establish All Corporate Entities

The Team

The Team

William Hargett | Lead Dev

William Hargett is the founder and lead developer of 100xGEMS. William is an information technology expert with a knack for altcoin marketing and community building. In the past 3 years, he has founded and managed multiple "shill clubs", which continue to hold thousands of crypto investors. He has also acted as CEX (centralized exchange) listing coordinator and lead moderator for multiple projects. William brings his marketing, negotiation & communication acumen to his passion project, 100xGEMS, in order to pool together crypto's strongest resources, community and education, and help bring crypto mainstream.

LinkedIn Profile <u>@WilliamNinja69</u>

Team Roles

"Romo" | Marketing & Listings Lead

"Romo" is responsible for managing the project's marketing budget and hiring the initial slate of social media influencers. He will also be responsible for engaging CEXs to list the 100xGEMS token, a role he has fulfilled successfully in previous projects.

"Jagger" | Crypto Education Lead

"Jagger" is responsible for creating the crypto education framework for current and future 100xGEMS holders. He will also be responsible for contracting expert consultants and select influencers to join our community. Jagger is a successful crypto investor and thought leader.

Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated or regulated in a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

**NOTE: Romo, Jagger & Queen will remain undoxxed unless otherwise decided by future events and joint team decisions.

"Queen" | Community Manager

"Queen" is responsible for facilitating conversations between current and future 100xGEMS holders on all of our social platforms. Say "hi" to her in Telegram and ask her what tweets the team is raiding any given day. She loves a helping hand & loves this #GemsFam community.

The Key Utilities

Our smart contract builder

A semi-inspired individual today can go to Fiverr and get a smart contract to deploy for just about \$100...

This copy-and-paste culture of "new" crypto projects has led to an epidemic of code fraught with error and malicious intent behind it. 100xGEMS seeks to erase that practice with the implementation of our one-of-a-kind customizable smart contract builder.

Profits made from our smart contract builder will be split 50/50 between buying back the 100xGEMS token on a monthly basis, as well as funding the production and marketing of our current and future utilities.

The saying is true: You get what you pay for. But that doesn't mean future builders in our space need to break the bank in order to get their hands on a quality contract.

© Copyright 2023 100xGEMS Token. All Rights Reserved. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to any person located in a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

Our fair launch deployer

Nothing ruins launch day like a handful of sniping and frontrunning bots unfairly carving out a better token position for their deployers, leaving you paying more for your bag...

Launch day can leave most retail investors feeling bitter and resentful, along with that inevitable questioning of whether or not the launch was **truly fair**. 100xGEMS has the technical formula to purge these pesky bots from the fun of launch day once and for all.

Profits made from our fair launch deployer will be split 50/50 between buying back the 100xGEMS token on a monthly basis, as well as funding the production and marketing of our current and future utilities.

We'll create the technical vacuum necessary to prevent bots from reaching that precious, newly-deployed contract address before retail investors have **their** opportunity to buy first.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk o loss. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

Our world-class crypto community platform

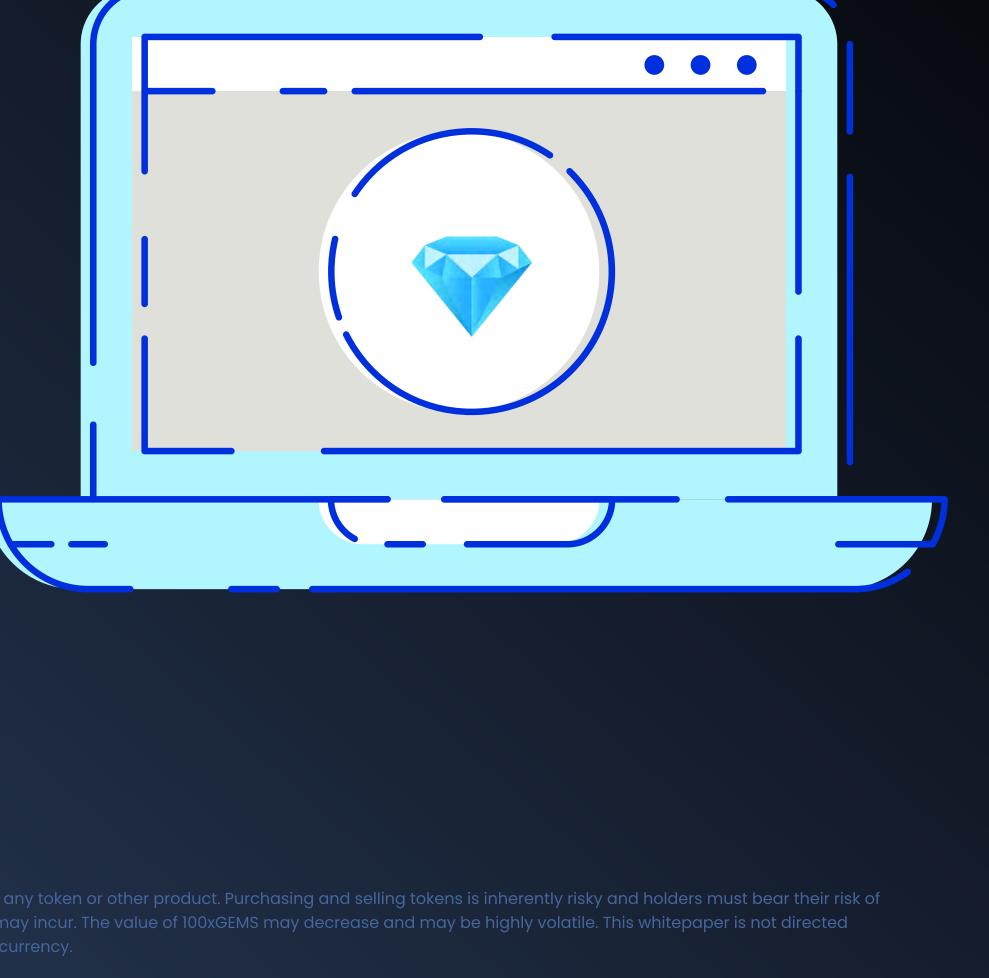

Today, splintered communities in the crypto space operate in silos of "hopium"...

This ultra-hyping has led to unforeseen toxicity, which only seeks to diminish our space rather than augment it. 100xGEMS plans to squash this practice by financially incentivizing all our communities to work and grow together in one place.

When the platform is live, 100xGEMS holders will be informed and educated by our experts of all of the available projects and communities that are actively building in our space through various virtual "lounges," including but not limited to a Holders Lounge, a New Projects Lounge, a Dev / Team Lounge, an Influencers Lounge and a Caller Banking Room.

100xGEMS holders will have key opportunities to vote on which projects 100xGEMS will invest funds from its holder investment wallet*. Funds from that wallet will then be invested into the winning project(s) and profits made from that investment will be distributed as **rewards** to holders on a weighted scale based on how many tokens a 100xGEMS holder possesses in their wallet(s).

*Please see TOKENOMICS section for more detail on the "holder investment wallet"

Our "Producers" NFT Collection

Lately, many NFT collections on OpenSea have seen plummeting floor prices due to their copycat concepts & utility-free imagery...

What a better way to enhance the crypto space than by offering an NFT collection that promises a vivid web3 ownership experience!

100xGEMS' "Producers" NFTs will launch a boutique collection in Phase III and carry with them some big added perks (and value) to be announced just prior to launch that will prompt any savvy crypto investor to be ready to buy on mint day.

At 100xGEMS, we're helping the space move away from **perceived value** and moving informed investors to hold things that possess **actual value** for the long-term.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to a jurisdiction where purchasing, selling or holding 100xGEMS is prohibited or regulated. Consult your local laws before transacting in any cryptocurrency.

Our "Shark Tank"-style crypto TV show

Crypto hasn't quite fully crept its way into mainstream culture yet, only because the SBFs of our space have been given more airtime for how they've **hurt** people rather than true crypto pioneers being given airtime for how they've **helped** people...

100xGEMS' solution to bringing crypto to the masses is releasing a reality TV series that disperses entertaining crypto awareness through its iconic & informed crypto personalities.

Launching in Phase IV, our series programming will solidify our unification efforts with our various disparate crypto communities and grow awareness of our space for years to come.

At 100xGEMS, our ongoing transparency with our holders, our ability to educate through empirical-based research and our unification efforts within the crypto community will make us a trustworthy, reliable & mainstream source of crypto awareness.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated. Consult your local laws before transacting in any cryptocurrency.

The Tokenomics

Tokenomics

The 100xGEMS buy/sell taxes are as follows:

1% to liquidity

1% to buy backs & burns

1% to marketing, contest, site development & exchange listings

1% to core (20% moderators / 20% shillers / 20% influencers & callers / 40% founder)

2% to the 100xGEMS holder investment wallet (this tax will initially be used for marketing costs until we reach 1k token holders)

That is a 6% buy tax, as well as a 6% sell tax.

© Copyright 2023 100xGEMS Token. All Rights Reserved. This whitepaper does not constitute an offer to purchase or solicitation to sell, nor is it a recommendation to buy or sell, any token or other product. Purchasing and selling tokens is inherently risky and holders must bear their risk of loss. Neither the authors of this whitepaper nor any participants in the 100xGEMS project accept any liability for losses or taxes that holders, purchasers or sellers of 100xGEMS may incur. The value of 100xGEMS may decrease and may be highly volatile. This whitepaper is not directed to regulated or regulated or regulated. Consult your local laws before transacting in any cryptocurrency.

How will 100xGEMS tokenomics help our own token hit that 100x?

Our tokenomics gives us the ability to make some choices in putting holder money to work. We fully understand that our project is fully financed with the investment of our holders. So that's why we call this a **holders first token** and why we will put your money to work.

How does the holder investment wallet work exactly?

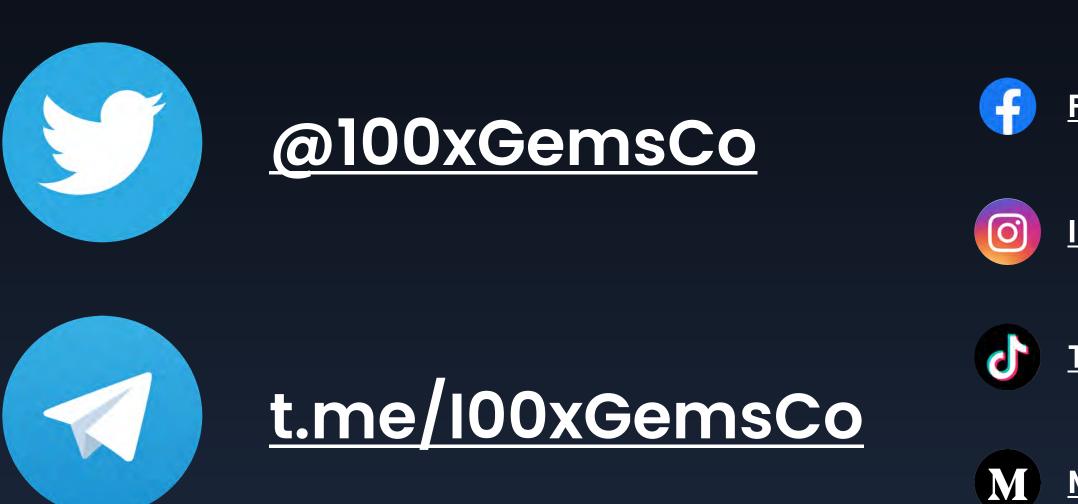

2 percent of every buy and every sale of our token will go into an investment wallet. Our community will vote on the projects to invest in and the holders will receive reward distributions from the profits, based on how much of the token a holder possesses, as follows:

- Highest risk micro baby MCs \$1000 max with a target of 4x to liquidate
- 2nd highest risks over 100k launch \$2000 max with a target 4x to liquidate
- 3rd highest risk 1 million MC projects \$10,000 with 50/50 removal 10x and 20x
- 4th highest risk 1 million MC minimum and greater than 30 days old & after the fall of first spike up to \$25,000 with hold up to 6 months but removing investment after 4x and holding remainder for 50–100x
- 5th highest risk big market caps and by vote. No set amount and during times of turmoil convert to USDC

10 percent of all profits will go to charity.

10 percent of all profits will go to the consultants that educated and guided said investment.

With our burgeoning crypto space riddled with rouge devs, disparate communities, worthless NFTs & mainstream absence, 100xGEMS serves to fix these repetitive problems through our aforementioned utilities.

Together, we can enlighten and enrich one another through our shared experiences in one place: 100xGEMS. Over time, we will build the colossal crypto space we've always imagined one informed investor at a time.
